

## P-SERIES VFD

**1-40HP (200~230VAC), 1-400HP (380~480VAC), 3Ø**

**Dual Rated for Constant & Variable Torque**

**Integrated PID Control**

The 32-character backlit LCD screen displays the drive's operational status and parameter settings. A very easy drive to set up.

### NEW FIRMWARE MAKES SETUP A SNAP

- Application based commissioning allows parameters to be automatically set based on industry standards
- Applications: Basic, circulating pump, supply fan, exhaust fan or cooling tower
- Selectable units include PSI, °F, °C, inWC, inM, Bar, mBar, Pa, kPa
- Belt loss protection

### SPACE VECTOR CONTROL FOR EFFICIENCY AND LONG MOTOR LIFE

- Cleaner sine wave as compared to typical V/Hz control. Motors run cooler and last longer

### ADVANCED PID CONTROL (PRE-PID AND DUAL PID)

- Maintain a constant control of pressure, flow or water level. This function includes Pre-PID, Sleep and Wake up and output inverse sub-functions
- Dual PID for external PID control or cascade PID control
- Multi-Motor

### MULTI-MOTOR CONTROL FUNCTION

- Control up to 4 motors

### AUTOMATIC ENERGY SAVINGS MODE

- Adaptive flux control for varying loads (e.g. damper loading)

### SLEEP AND WAKE UP FUNCTION

- Increased energy savings by deactivating drive during low demand

### FLYING START PROTECTION

- Prevents trips, rough starts, and drive damage from regenerative power from heavy fan inertia rotation

### BUILT-IN MODBUS RTU COMMUNICATION

- Optional: Profibus-DP, LonWorks, BACnet

BACnet® is a registered trademark of ASHRAE.

## PRE-HEATER FUNCTION

- Used to protect motor and inverter from damage when installed in damp location (e.g. green house).

The P-Series' clearly marked terminal inputs and outputs allow for easy wiring and setup.

## AUTOMATIC CARRIER FREQUENCY CHANGE

- Adjusts based on temperature for optimal operation

## SELECTABLE V/F, SENSORLESS VECTOR CONTROL

- Ideal for any control requirement

## LONG-LIFE CONDENSER & SIMPLE FRAMEWORK

- Increased reliability

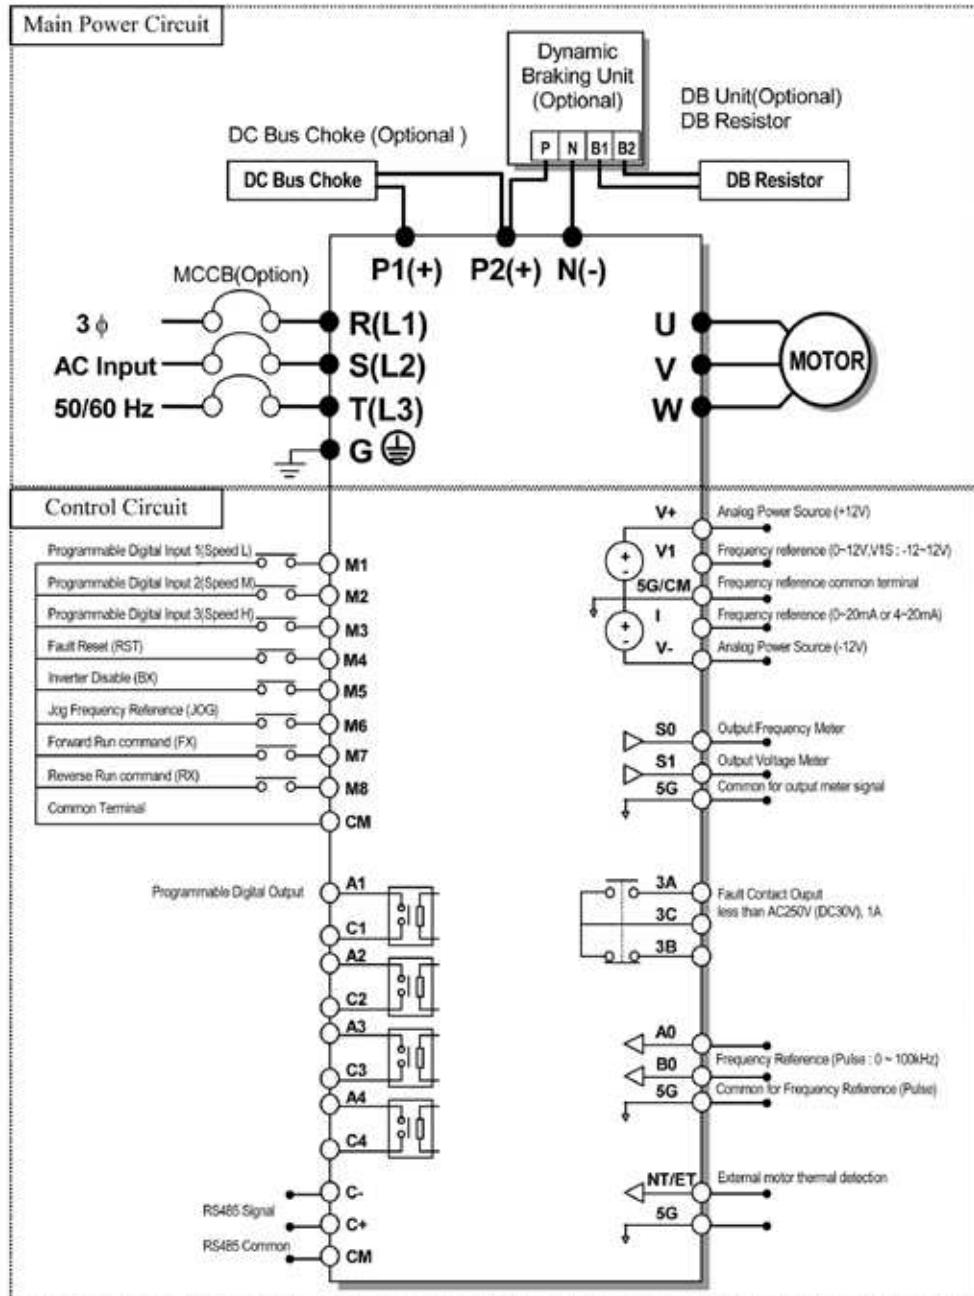

Perfect for fans, pumps and airhandlers.

## Specifications

Output ratings	Voltage (V)	Three phase, 200~230V, Three phase, 380~480V
	Frequency (Hz)	0~120Hz
Input ratings	Voltage (V)	Three phase, 200~230V (-15%, +10%), Three phase, 380~480V (-15%, +10%)
	Frequency (Hz)	50~60Hz ( $\pm 5\%$ )
Operation	Input Power Factor	<.95 from no load to full load
	Drive Efficiency	>96%
	Control method	V/F control, Sensorless vector control
	Frequency setting resolution	Digital reference: 0.01Hz (below 99Hz) & 0.1Hz (100Hz and over); Analog reference: 0.06Hz at 60Hz
	Frequency setting accuracy	Digital: 0.01% of maximum output frequency; Analog: 0.1% of maximum output frequency
	V/F ratio	Linear, Square, User V/F
	Overload capacity	1 minute at 120%, 10 seconds at 150% (with inverse characteristic proportional to time)
	Torque boost	Auto, Manual (0~15%)
	Multi-function input terminals	Total 8 inputs (programmable)
	Analog output	0~10V linear
Input signal	Operator control	32-character LCD keypad, Terminals, ModBus-RTU communication Optional, ProfiBus-DP, DeviceNet, F-Net, BACnet, LonWorks
	Frequency setting	Analog: 0~10V, 4~20mA, additional port for Sub-Board (0~10V); Digital: Keypad, Communication
	Start signal	Forward, Reverse
	Multi-step operation	Setting up to 17 speeds (using multi-function terminal)
	Multi-step accel/decel time	0.1~6000 seconds. Maximum 8 pre-defined steps using multi-function terminals
Output signal	Operational functions	DC braking, Frequency limit, Frequency jump, Second motor function, Slip compensation, Reverse rotation prevention, Auto restart, Inverter bypass, Auto-tuning, Dual PID control
	Emergency stop	Stops output from inverter
	Auto operation	Operates from internal sequence by setting multi-function terminal (5 way x 8 step)
	Jog	Jog operation
	Fault reset	Resets fault signal when protective function is active
Protective functions	Operational status	Frequency detection, Overload alarm, Stall, Overvoltage, Undervoltage, Inverter overheat, Run, Stop, Constant speed, Speed search, Fault output, Inverter bypass, Auto-operation sequence
	Indicator	Output frequency, Output current, Output voltage, DC voltage, Output torque (output voltage: 0~10V)
Trip	Overvoltage, Undervoltage, Overcurrent, Inverter overheat, Motor overheat, I/O phase loss, Fuse open, Ground fault, External fault 1, 2, Option fault, Overload, Speed command loss, Hardware fault, Communication error, etc.	
	Alarm	Stall, Overload Temperature sensor fault
Operating environment	Ambient temperature	-10~40°C (50°C when derated 20%) or 14~104°F (122°F when derated 20%)
	Storage temperature	-20~65°C or -4~149.5°F
	Humidity	Less than 95% Relative Humidity maximum (non-condensing)
	Vibration	Below 5.9m²/sec (=0.6g)
	Altitude	Below 1,000m (3,300ft): Derate VFD by 10% for every additional 1,000m
Application site	Pollution degree 2. No corrosive gas, combustible gas, oil mist or dust	

# P-SERIES WIRING

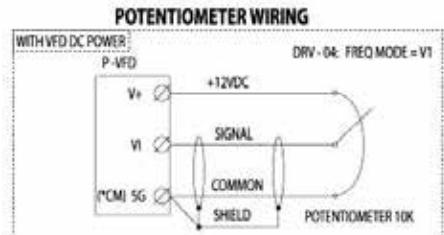

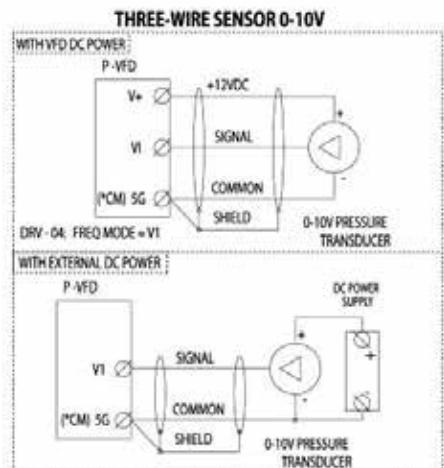

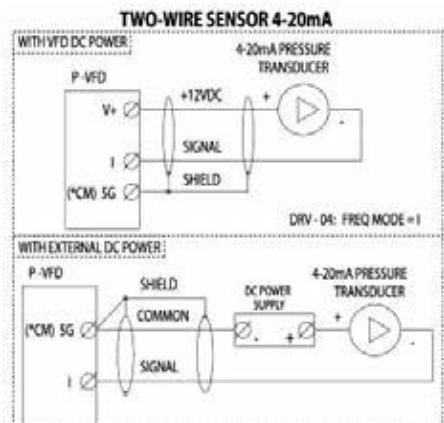

1) For 5.5~90kW (7.5~125HP)

Note : 1) 5G is Common Ground for Analog Input/Output for 7.5-40HP

2) 5G is Common Ground for Analog Meter Output (S0,S1) and External motor thermal detection (ET).

3) Use terminal V1 for V1, V1S (0~12V -12 ~ 12V) input.

\*NOTE USE "5G" FOR 1.5-40HP VFDs and "CM" FOR OVER 40HP VFDs.

\*For general reference only, not field wiring. Consult installation instructions.

### Options

Part Number	Description
CI-RPK-EXT2M-P/S	Remote Keypad Mounting Kit (2 Meter Cable)
CI-RPK-EXT3M-P/S	Remote Keypad Mounting Kit (3 Meter Cable)
CI-RPK-EXT5M-P/S	Remote Keypad Mounting Kit (5 Meter Cable)
CI-R4-COM	RS485 communication card
CI-BN-COM	BACnet communication card
CI-LWP-COM	Lonworks communication card
CI-N2-COM	N2 communication card
